SAIFULDEEN ALI MAJEED

Computer Engineer

Address Famagusta, Magusa, 99628

Phone +90 533 850 8590

E-mail saif385299@gmail.com

Insightful, engaged, creative computer engineering student who excels at Python, C, and SQL. As well as with an extensive foundation in Web-development, and Java programming. Maintained a 3.8 average in core programming courses.
Seeking a computer engineering internship at your respective company to leverage exemplary leadership and team player skills, analytical skills, and programming skills. And succeed as a junior developer at your respective company.

Education

Feb 2019 - Current

Bachelor of Science: Computer Engineering

Eastern Mediterranean University (EMU) - Northern Cyprus, Famagusta

- Awarded High Honour Certification 3 times.
- Awarded an Honour Certification.

Oct 2016 - Oct 2018

High School Diploma

Mutiara International Grammer School (MIGS) - Malaysia, Kuala Lumpur

- Awarded IT Support Team Leader Appreciation Award for Senior School Inter-House Debate.
- Awarded IT Support Team Member Appreciation Award for Senior School Talent Show.

Oct 2017 - Dec 2017

Artificial Intelligence And Robotics

Extra- Curricular Activities - Malaysia, Kuala Lumpur

- Completed professional development in programming and building simple-functions robots.

Accomplishments

- **Collaborated with team of 4 in the development of a Real Estate web-application.**

| The project creates a new, more interactive web application that provides users, realtors, and house owners a platform to communicate in ease. As the application provides the following features and many more:

| o Auto web-translation based on user location.
| o A 24/7 AI ChatBot with a built-in translator.
| o A variety of property viewing options, such as VR, 3D.

- **Collaborated with team of 5 in the development of an Airline Reservation System.**

| The project creates a rich and easy to use web application that provides passengers a platform to book and view flights with ease.

- **RFID Tag Auto-Checkout Shopping Cart:**

| The project focused on an RFID system, that's placed on a shopping cart, eliminating the long line wait at the cashier.

| **o** Coded the backend in Python.
| **o** Created a friendly frontend using Tkinter.
| **o** Designed a simple database using MySQL.
| **o** Coded Arduino board that reads RFID tags.

- **Excel registrar:**

| The project focused on reading a csv file and writing into the file predefined datasets, including a criterion search to ease entry. And a coordinates location founder (Google API) .

| **o** Coded as a CLI-based Python program.

- **Automated login with encrypted Emails and Passwords memorization :**

| The project focused on registering the users' login information into a database in a Sha256 encryption format. It helps the user to login with a single authentication method (Thumbprint, Password, Google Tab yes Login).

| **o** Coded as a CLI-based Python program.
| **o** Any data accessed is registered in a separate database.
| **o** Any data modification, the location, IP, Device name & MAC addresses are registered.

Soft Skills

- Cultural Awareness — Excellent
- Teamwork and Collaboration — Excellent
- Critical Thinking — Excellent
- Problem-Solving — Very Good
- Flexible and Adaptable — Excellent
- Analytical and Critical Thinking — Very Good
- Maintenance and Repair — Very Good
- Interpersonal Communication — Excellent
- Attention to Detail — Excellent
- Multitasking Abilities — Very Good

Technical Skills

- Microsoft Office — Excellent
- Python — Excellent
- Software programming — Very Good
- Web App Development — Very Good
- Client-Server Communication — Good
- Dart Language — Good
- Relational databases — Very Good
- Java programming — Good
- Database programming — Very Good
- C programming — Very Good

Languages

- English — Excellent
- Arabic — Excellent
- Turkish — Average

Interests

- Swimming
- Volleyball
- Football
- Formula 1 racing
- Tennis
- Traveling
